

Nobody expects the Software Inquisition

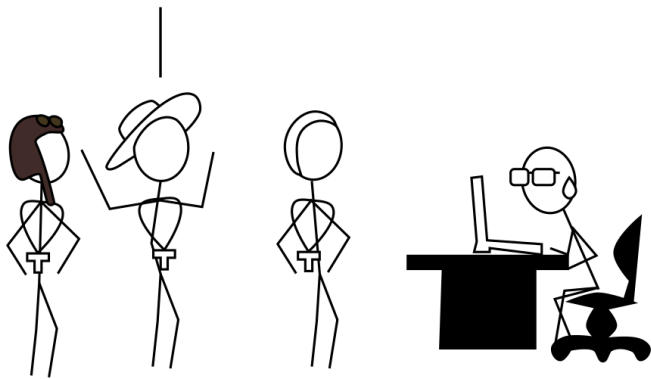

*Finally, my code is complete!
I only need to deploy to production
to mark it "done done".*

NOBODY expects the
Software Inquisition!

*Amongst our weaponry are such diverse elements as:
Fear, surprise, ruthless efficiency, an almost fanatical
devotion to testing!*

*Given you didn't test your code
And you won't confess
When we torture you with testing
Then you will confess!*
