

Class conflict

Have you heard about Karl Max?

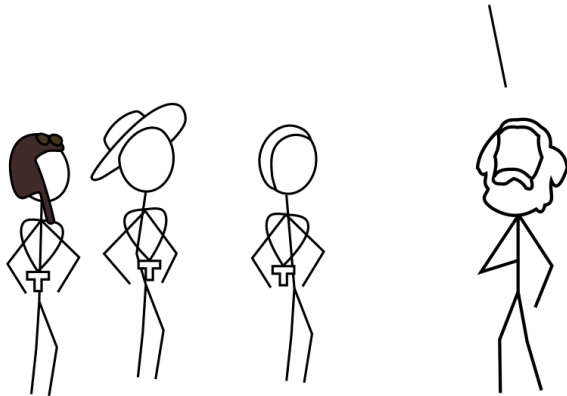

No! Karl "Max" - the new Manager!

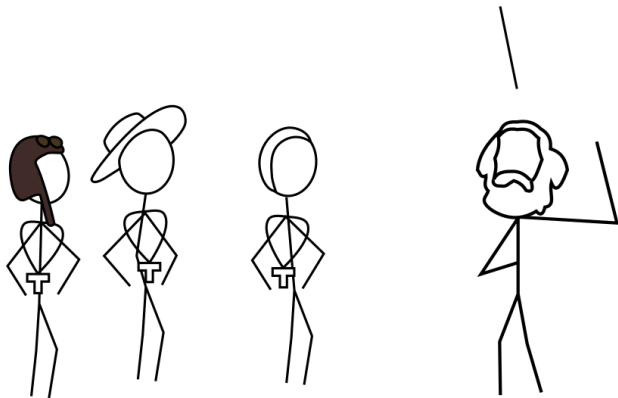

Hi Guys!

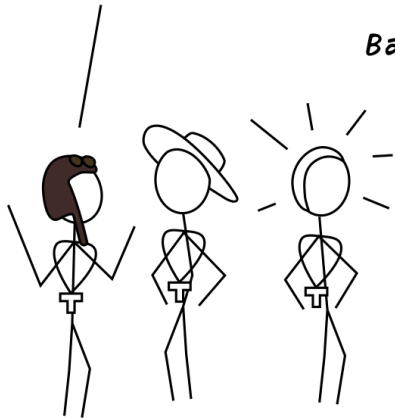

*Your code quality and agile progress looks good,
but there is a long road ahead of us.*

*We should skip this road with a code revolution
and get to a state where all classes are equal!*

We can't, because of a merge conflict

Bah... just git push --force it

What about the conflicts?

Stash them in the GULAG
