

IF Columbus couldn't Fail

The contract: if I can't deliver, then the Spanish queen will have my head!

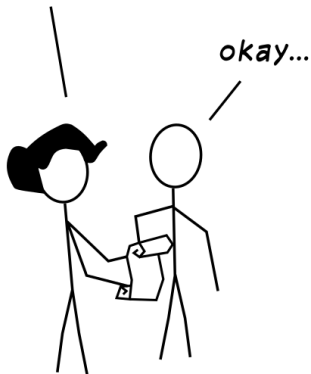

1. *We have 10 story points to complete this project*

But 10 is not a Fibonacci number

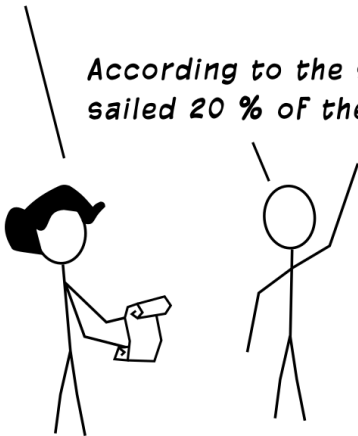

According to appendix A, the Spanish Inquisition made Fibonacci make an exception!

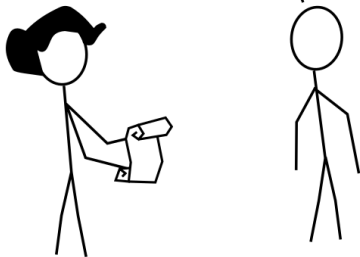

2. one story point = one week

According to the stars, we have only sailed 20 % of the way to India

We have already used 9.57 story points, and I can't afford to lose my head, can you?

I guess this project is too-big-to-fail!

3. Goal: map the western trading route
From the Spanish to the Indians

But captain, this is not India!

We will call these people Indians - delivery complete ✓
