

Why division by zero is not allowed

Ahhh... JavaScript!

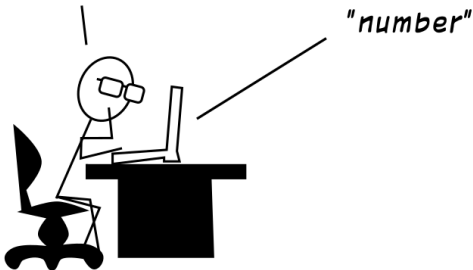

Let's try something Fun, like 4/0

*Wasn't division by zero not allowed in math?
Well... infinity does make sense!*

*Lets try:
typeof (Infinity)*

Makes sense!

*What is $4 * \text{InFinity}$*

InFinity

Makes sense too!

IF $0 * 4 = 0$

and $Infinity * 4 = Infinity$

Then what is $0 * Infinity$

NaN? Not a Number?

Hmmm.... what is the typeof (NaN)?

"number"

Oh...
