

Why it is so hard to succeed?

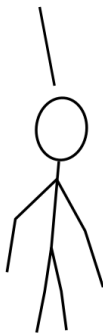

IF I have an IQ of 147, then it means I am on average cleverer than 999 out of a 1000 people.

But globally there would be almost 8 million people that have a higher IQ than me.

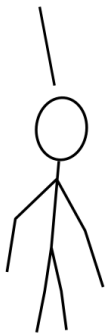

*IF they all lived in Denmark, then I would
be the stupidest person in Denmark!*

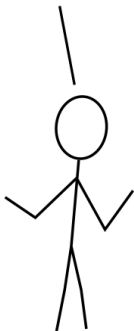

*No wonder, that I Feel worthless
in the global competition.*

But there is actually a spot, where I am in top 1!

This is the spot, where I should compete!

It is: To be me in my context.

*I can use it to build the Foundation I need,
so I can grow one step at a time!*
